AWS • NODE.JS • TYPESCRIPT • REACT • SOLUTION ARCHITECTURE • TECHNICAL LEADERSHIP

PROFILE

Senior Software Engineer with 10+ years of experience designing, architecting, and delivering enterprise cloud-native applications. Expertise in AWS serverless architecture, React, Node.js, TypeScript, C#/.NET, and Java. Proven track record leading technical initiatives, mentoring engineers, modernizing enterprise platforms, reducing infrastructure costs, and building scalable systems supporting millions of daily requests.

SELECTED IMPACT

\$300K annual operational savings	80% AI inference cost reduction	45% Azure database cost reduction	18M+ daily platform requests
---	---	---	--

CORE COMPETENCIES

Cloud & AWS	Lambda, API Gateway, EventBridge, DynamoDB, S3, IAM, CDK, Bedrock	Languages	TypeScript, JavaScript, Node.js, Java, C#/.NET, SQL, Python
Frontend	React, React Native, Angular	Architecture	Serverless, Microservices, REST APIs, Event-Driven Architecture,DDD, CI/CD
Leadership	Solution Architecture, Technical Leadership, Code Reviews, Mentoring		

PROFESSIONAL EXPERIENCE

City Electric Supply Senior Cloud Software Engineer	September 2024 – Present Remote
- Lead architecture for a large-scale warehouse modernization initiative, mentoring engineers and delivering full-stack applications with React, Node.js, TypeScript, and AWS. - Architected a replenishment and inventory management platform projected to reduce operational costs by approximately \$300K annually. - Built an internal developer platform of reusable AWS CDK constructs, shared TypeScript SDKs, and CLI tooling that standardized provisioning and accelerated delivery. - Reduced Amazon Bedrock AI inference costs by approximately 80% through model optimization while contributing to enterprise AI platform development.	
EControls Senior Full Stack Engineer	February 2022 – September 2024 San Antonio, TX
- Designed scalable enterprise applications using C#/.NET, Azure, Angular, and SQL, improving modularity and long-term platform evolution. - Reduced Azure production database costs by 45% and improved frontend build performance by 79% through infrastructure and tooling optimization. - Developed Azure Functions automation and a K6 performance testing framework to identify API bottlenecks and improve reliability.	
Extend Software Engineer II	July 2022 – December 2023 Remote
- Developed cloud-native applications using React, TypeScript, Node.js, AWS Lambda, DynamoDB, CloudFormation, and CDK. - Improved AWS CDK deployment performance by 25% through infrastructure modernization and CI/CD optimization. - Contributed to an offers platform processing 18M+ daily requests with sub-250ms response times.	

PROFESSIONAL EXPERIENCE · CONTINUED

Terazo**Software Engineer**May 2021 – July 2022
Remote

- Built enterprise web and mobile applications using React, React Native, Node.js, TypeScript, AWS, and Twilio.
- Designed backend APIs and cloud services supporting scalable client applications.
- Partnered with distributed client teams from requirements and technical design through deployment and production support.
- Served as acting technical lead by mentoring engineers, performing code reviews, and coordinating engineering efforts.

Fiserv**Senior Software Engineer**September 2019 – May 2021
San Antonio, TX

- Developed enterprise financial applications using Java, Spring Boot, Angular, AWS, Oracle SQL, and microservices.
- Modernized frontend applications through AngularJS-to-Angular migrations while reducing technical debt.
- Mentored engineers through code reviews, technical talks, and engineering best practices.

H-E-B**Software Engineer II**January 2016 – September 2019
San Antonio, TX

- Developed enterprise applications and analytics platforms using Java, Spring Boot, Angular, AWS, and Oracle SQL.
- Built pricing analytics solutions and contributed to customer-facing chatbot initiatives.
- Mentored frontend engineers and promoted Angular best practices across development teams.

EDUCATION

University of Texas at San Antonio**Bachelor of Science, Computer Science**

November 2015

WHAT I BRING

Pragmatic architecture, clear technical leadership, and an instinct for turning complex systems into dependable products.
